

mackinaw city comets will be bringing back comet football as they have enough kids to have their own team. after the rec closed down due to lack of involvement by community there they have turned the area into a football field and stands. the town is very happy as it has been over 50 years since mackinaw has had their very own team. i took some time to talk to the people of mackinaw to see their reactions.

" i am very excited it will help the city with money and now every friday we have a game to watch we dont have to go 10 miles either way to watch a high school game. the coach will be peyton manning this is what he had to say about it all, " i am very excited im not focused on winning it all this year but it is a great opportunity for the kids health wise and to be involved in team bonding".
